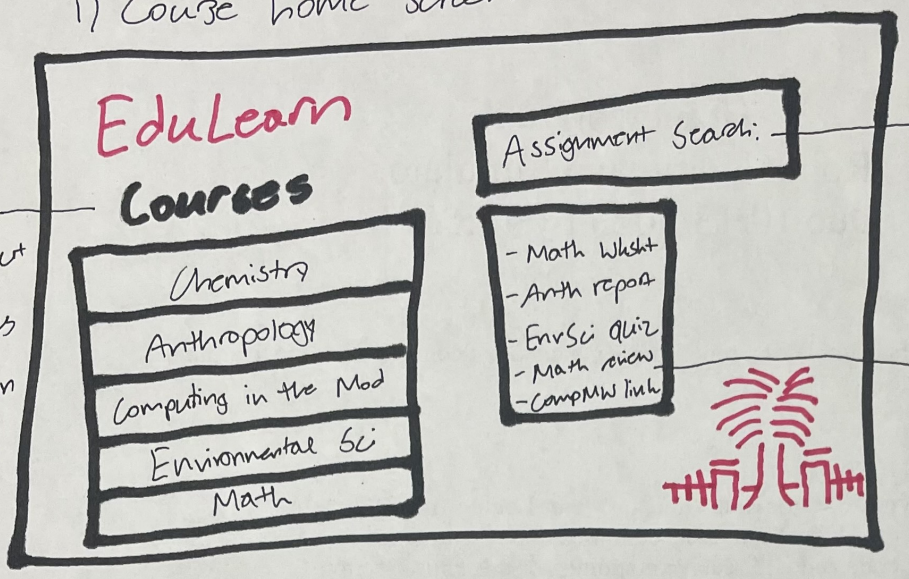
In my storyboard, the user is attempting to submit an assignment. The sketches walk through the course page, the assignment submission page, and then two ways for the user to get graded feedback on their work.

Matthew Botteon

1) Course home screen

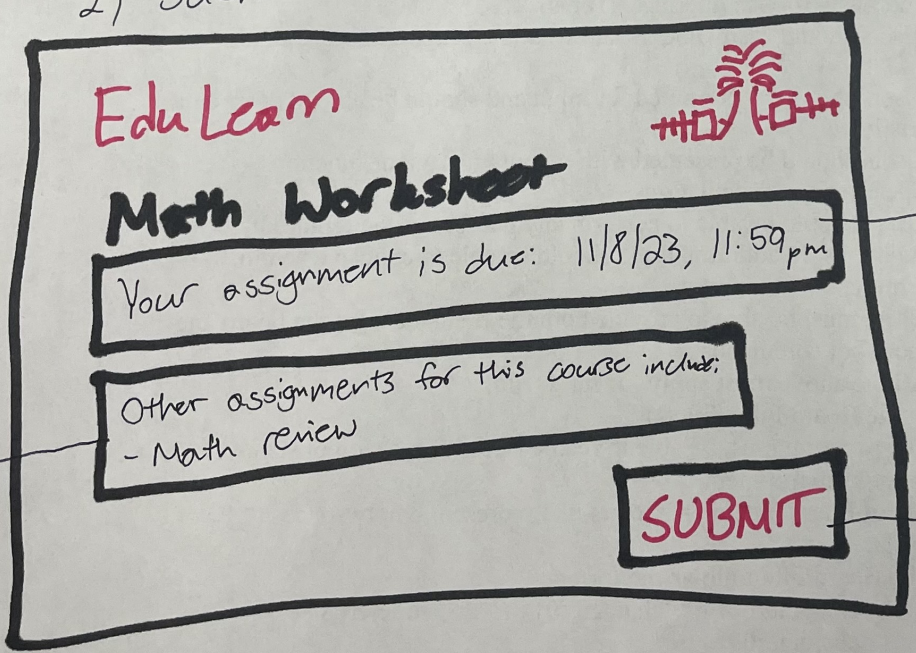


courses page lays out all courses neatly and on one screen

assignment search allows you to type in search bar for assignments

assignments with closest deadlines are depicted here

2) Submission window



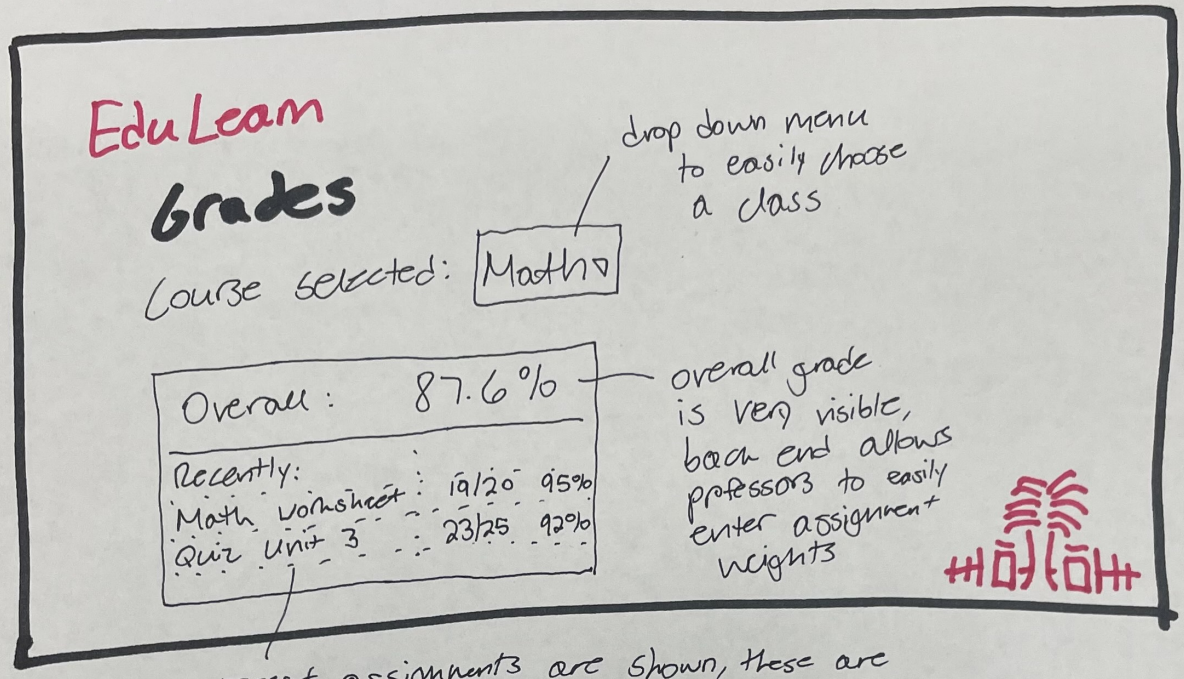
assignment due date clearly identified

reminds user of other things due in that same course

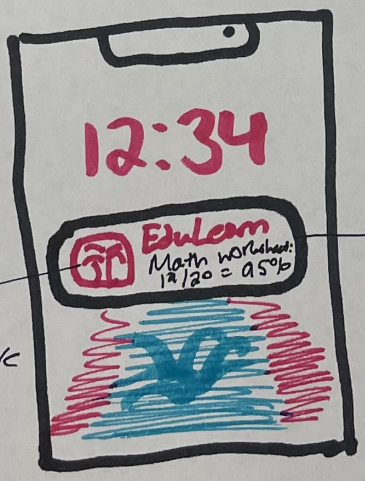
submit button clear and easy to find

Matthew Botteon

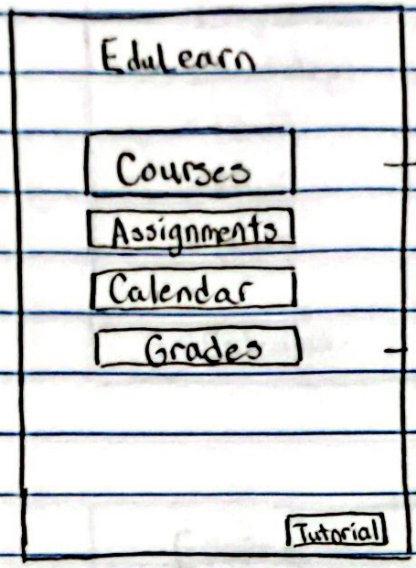
3) Grades screen - to check after submission



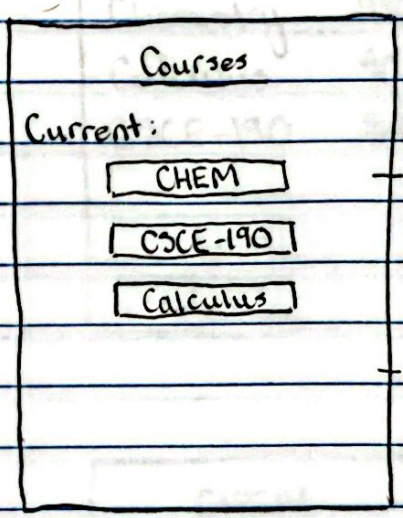
4) mobile app notification



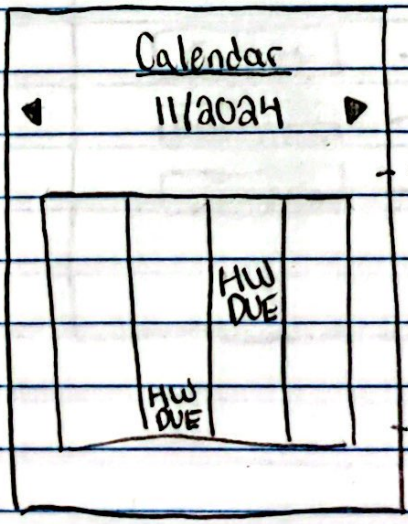
Sketch - Isaac



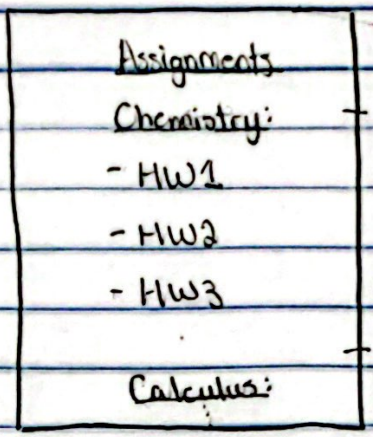
- each button has own functionality
- simple interface



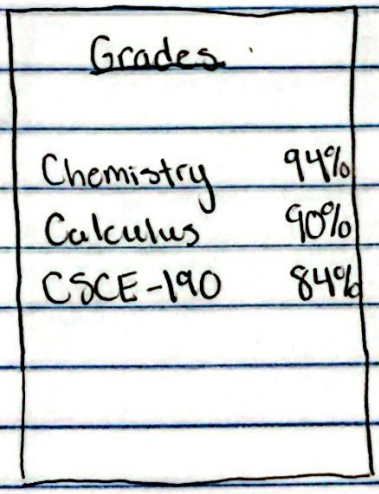
- each course button takes to respective course controlled by professor
- works with previous assignments and grades sections



- simple way to show when homework from every course is due
- clicking on the piece will take user to the assignment

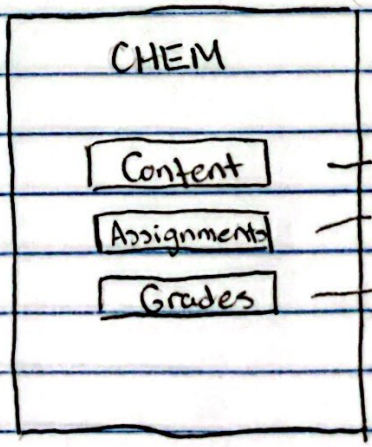


- list of course
  - with sublist of upcoming assignments created by professor
- clicking on the course takes user to its respective page



- course names on left-hand side
  - takes to respective page
- grade on right-hand side
  - clicking shows each assignment grade

Sample course page:



- place for professor to post syllabus, slides, etc.
- takes user to assignment page
- takes user to page with each assignment grade
